How can we help you?

BMA is a WBENC certified CRO providing expertise in clinical trial Study Management, Cold Chain Management, Data Management, Auditing and Clinical Monitoring. Our 18 years of success and growth have resulted from an unchanged approach that has stood the test of time - provide quality, commitment, excellence, value and personalized, flexible service to our clients to support their clinical trial needs. Our commitment to our customers and their projects, as well as the consistent quality of our work is the foundation of our company.

SUPERIOR MONITORING FOR QUALITY PRODUCTS

Innovative Expertise for Your Clinical Trial Needs

YOUR PRODUCT, OUR PRIORITY

From manufacture to subject administration, BMA will monitor your temperature sensitive drugs, devices and biologics to ensure that the cold chain is maintained and documented. Our broad experience and in-depth knowledge of industry standards, as well as Good Manufacturing, Distribution and Storage Practices, will ensure that safe and viable products reach your subjects.

PLANNING & DEVELOPMENT

- Proactive Cold Chain planning with the development of study-level procedures and documentation
- Selection of Investigational Product shipping and monitoring equipment based on sponsor and product specifications
- Delivery of customized training to sponsor team and monitoring staff
- Liaise and coordinate with sponsor selected complementary vendors (shipping, logistics, warehouse)

COLD CHAIN CAPABILITY

- Risk mitigation through assessments of site cold chain storage capability
- Identification and implementation of resolutions to impediments in transport and storage of temperature sensitive products
- Evaluation of existing site temperature monitoring systems to ensure compliance with sponsor specifications
- Customized training for site staff on cold chain best practices and study-specific requirements

CONTINUOUS MONITORING

- Extensive knowledge of temperature monitoring devices and systems, refrigerators, and best practices
- Dissemination and management of study specific temperature monitoring devices
- Ongoing site monitoring for cold chain compliance
- Temperature deviation identification, follow-up, quarantine & corrective action
- Supplemental support to field monitors

CUSTOMIZABLE SERVICES

- Audit-ready documentation prepared and maintained throughout the life of your clinical trial
- Negotiation of site specific cold chain budgets
- Employ the use of sponsor and distributor's randomization and distribution systems
- Maintenance of sponsor systems & databases
- Study Managers and Certified In-house & Field Monitors to support your clinical trial needs
