

Your CRO for Success

YOUR FIRST CHOICE FOR QUALITY, COST-EFFECTIVE PRODUCT TEMPERATURE MONITORING

During clinical trials, it is imperative that the integrity of temperature sensitive drugs, devices and biologics be maintained.

Drugs, Devices and Biologics can require continuous temperature monitoring from manufacture to subject administration in order to document safety and efficacy. BMA will manage continuous temperature monitoring to ensure that the cold chain is adequately maintained.

“ Get the most out of your study and resources by partnering with BMA ”

Our goal is to provide world class support services that keep your projects on time, within budget and compliant to all regulatory authorities.

Drug, Device & Biologics Cold Chain Temperature Monitoring

- Development of Study-Level Cold Chain Procedures & Documentation
- Hands-on Site Training & Guidance
- Selection/Recommendation of Temperature Monitoring Equipment
- Dissemination & Collection of Monitoring Devices & Forms
- Initial Site Assessments
- Evaluation of Existing Site Temperature Monitoring Systems to Ensure Compliance with Sponsor Specifications
- Ongoing Site Monitoring for Cold Chain Compliance
- Deviation Follow-up, Quarantine & Corrective Action
- Assist Sites with Identification of Solutions to Challenges in Meeting Sponsor Specified Storage Guidelines
